Tonya J Adams-Mendez, CZT

INSTRUCTIONS:

1. Using diagonal lines as a "string", draw different ZENTANGLE® patterns in each row of triangles connecting the designs at the tick marks. Refer to pattern guide at left for row layout.
2. Cut along the bold outside line.
3. Fold and crease dashed lines - folding the front side together. Unfold.
4. Fold and crease solid diagonal lines - folding the back side together. Unfold.
5. Gently roll paper together connecting the dots and aligning the points to form a tube.
6. Add glue on sections marked GLUE, press together, and hold until dry. (Hot glue works well.)
7. Fold solid end tabs into inside of tube. Add glue on dashed end tabs and tuck into open end of tube along with solid end tabs. Press to seal.
